Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, drawn to a CVD apparatus with gas supply with supply pipes the same length, classified in class 118, subclass 715.
 - II. Claims 4 and 5, drawn to a CVD apparatus with a suppression gas pipe, classified in class 118, subclass 715.
 - III. Claims 6-10, drawn to a CVD apparatus with gas flow rate control mechanism, classified in class 118, subclass 715.
 - IV. Claims 11 and 12, drawn to a CVD apparatus with a timing control mechanism, classified in class 118, subclass 699.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and have different modes of operation.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be

traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
